## **DETAILED ACTION**

### **Allowable Subject Matter**

Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1-21 are allowed, because the prior art alone or in combination among other limitations does not teach or suggest to one of ordinary skill in the art "An object drawing method in a video game comprising: receiving object data representing an object at a particular instance of a virtual time-space continuum; generating a dummy object of said object, the dummy object having an identical shape of said object..." wherein the object and the dummy object are generated from the same object data which represents the object at a particular instance of the virtual time space continuum, and that said instance can be represented in a digital video frame. The closest prior art, Peterson "3D Studio MAX 2 Fundamentals", teaches a method of how to make animation appear more realistic by including motion blur, however said techniques for generating motion blur fail to teach the previously stated limitations contained in the applicants claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
